About GeoRide

“When my motorcycle was stolen in 2017 despite several classic locks, I decided to invent the future of motorcycles.”

Thomas Chambon, known as Walane on Youtube, has just created GeoRide. After a few adventures and a lot of work, GeoRide is determined to shake up the archaic world of motorcycling. !

The objective? Improve the daily lives of motorcyclists and their loved ones by bringing them more peace of mind and security.

How ? By creating a complete and connected solution that links the rider to his motorcycle. With GeoRide, any rider can have his motorcycle in his pocket, no matter where he is.

2018

GeoRide
Lauch

2019

Best GPS Tracker
award

2021

GeoRide 3
Launch

2022

Launch in Europe
and in the USA

THE **GEORIDE** CONCEPT

GPS TRACKER

Specially designed for the motorcycle

CONNECTED ALARM

Silent and remote-controlled siren...

CRASH DETECTOR

With emergency services auto-call

GPS TRACKER

Locate in real time

Enjoy precise localization thanks to a position updated every second for real time tracking.

Replay your trips

With the Replay Mode, you can fully relive your trips : from speed to incline, including the weather.

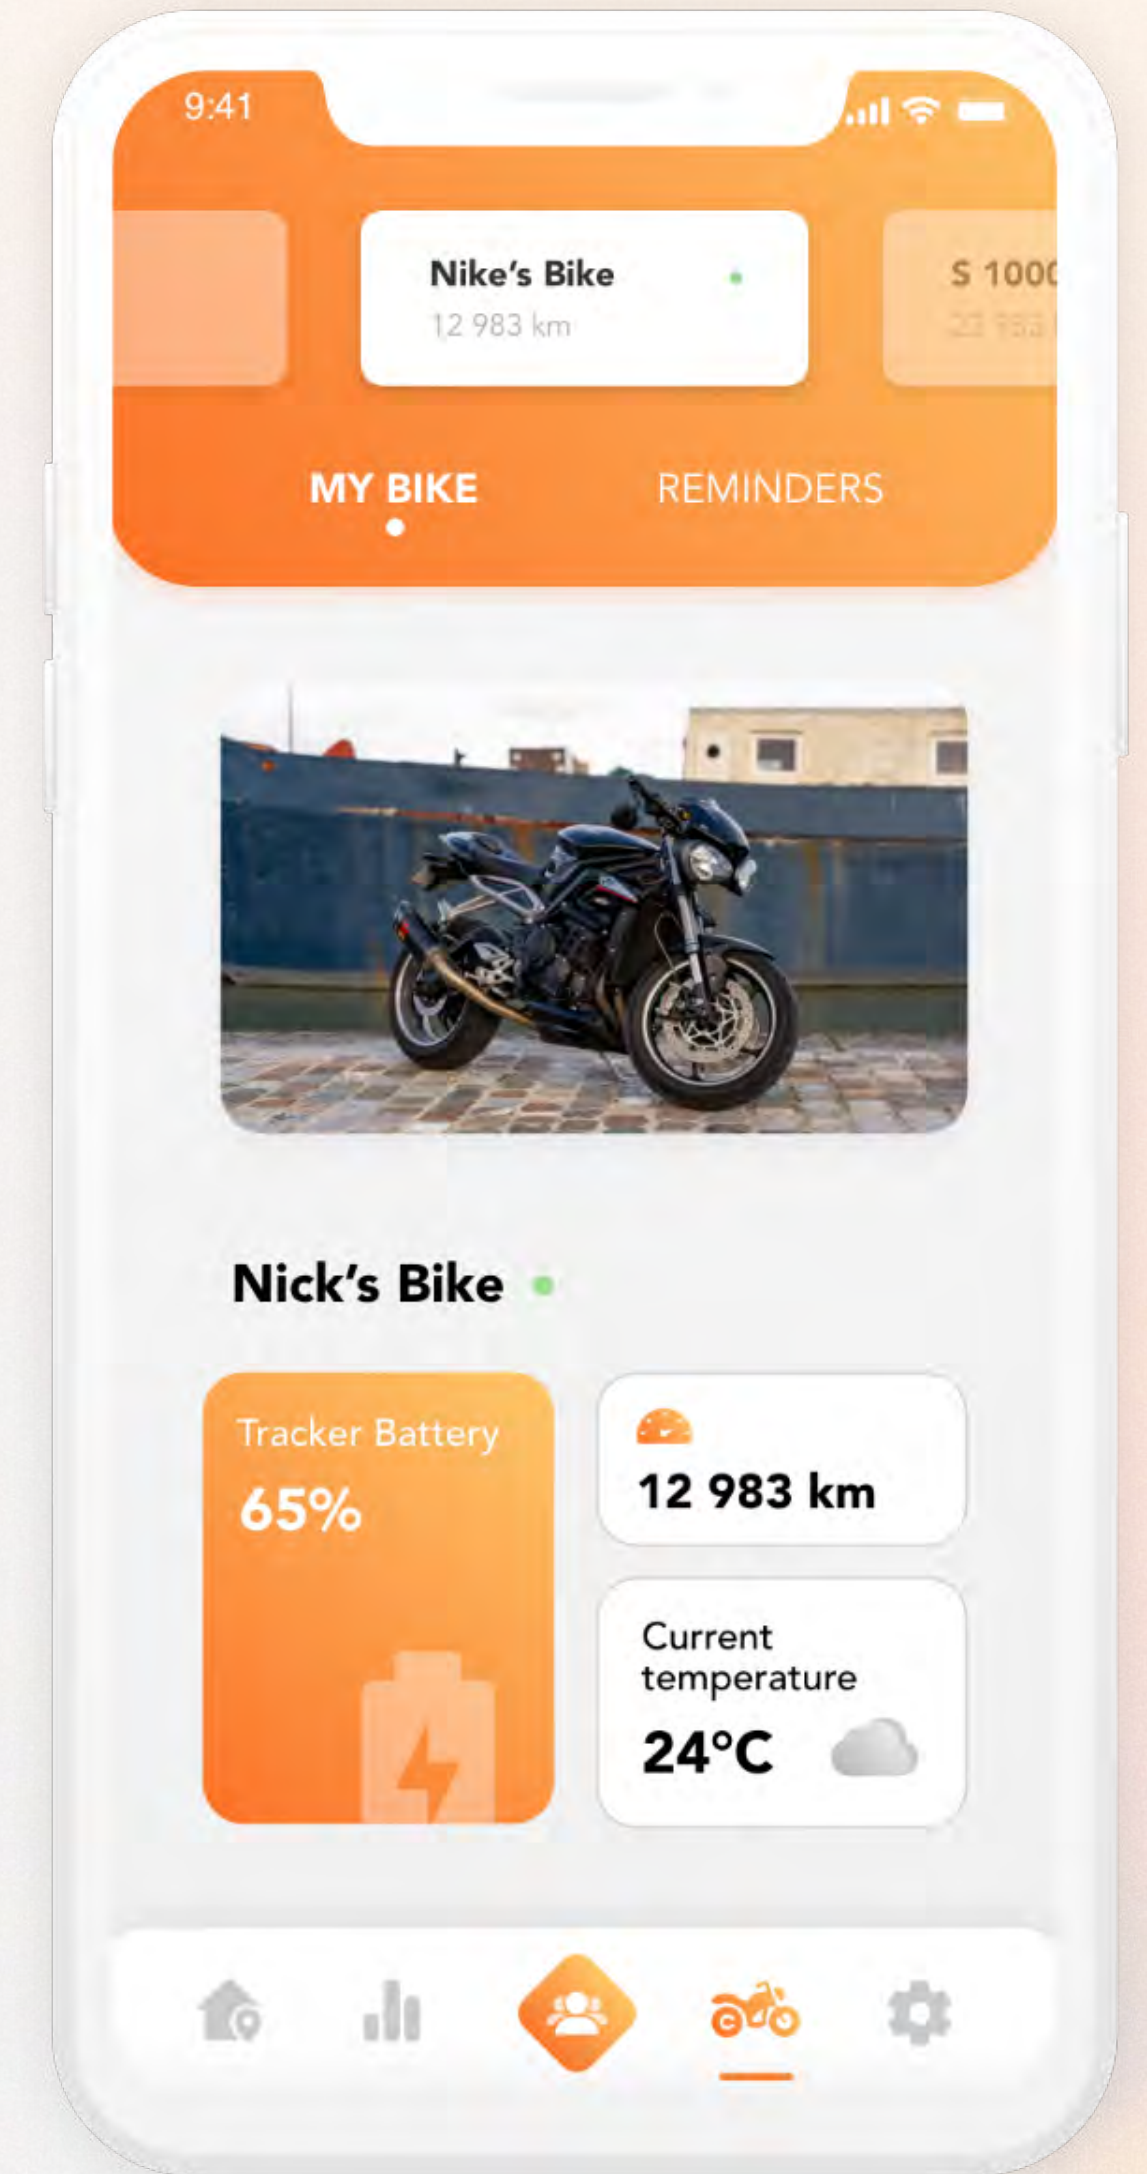

Share the access to your application

Your loved ones can follow your journeys and also receive a notification when you arrive at your destination.

Track Your Maintenance

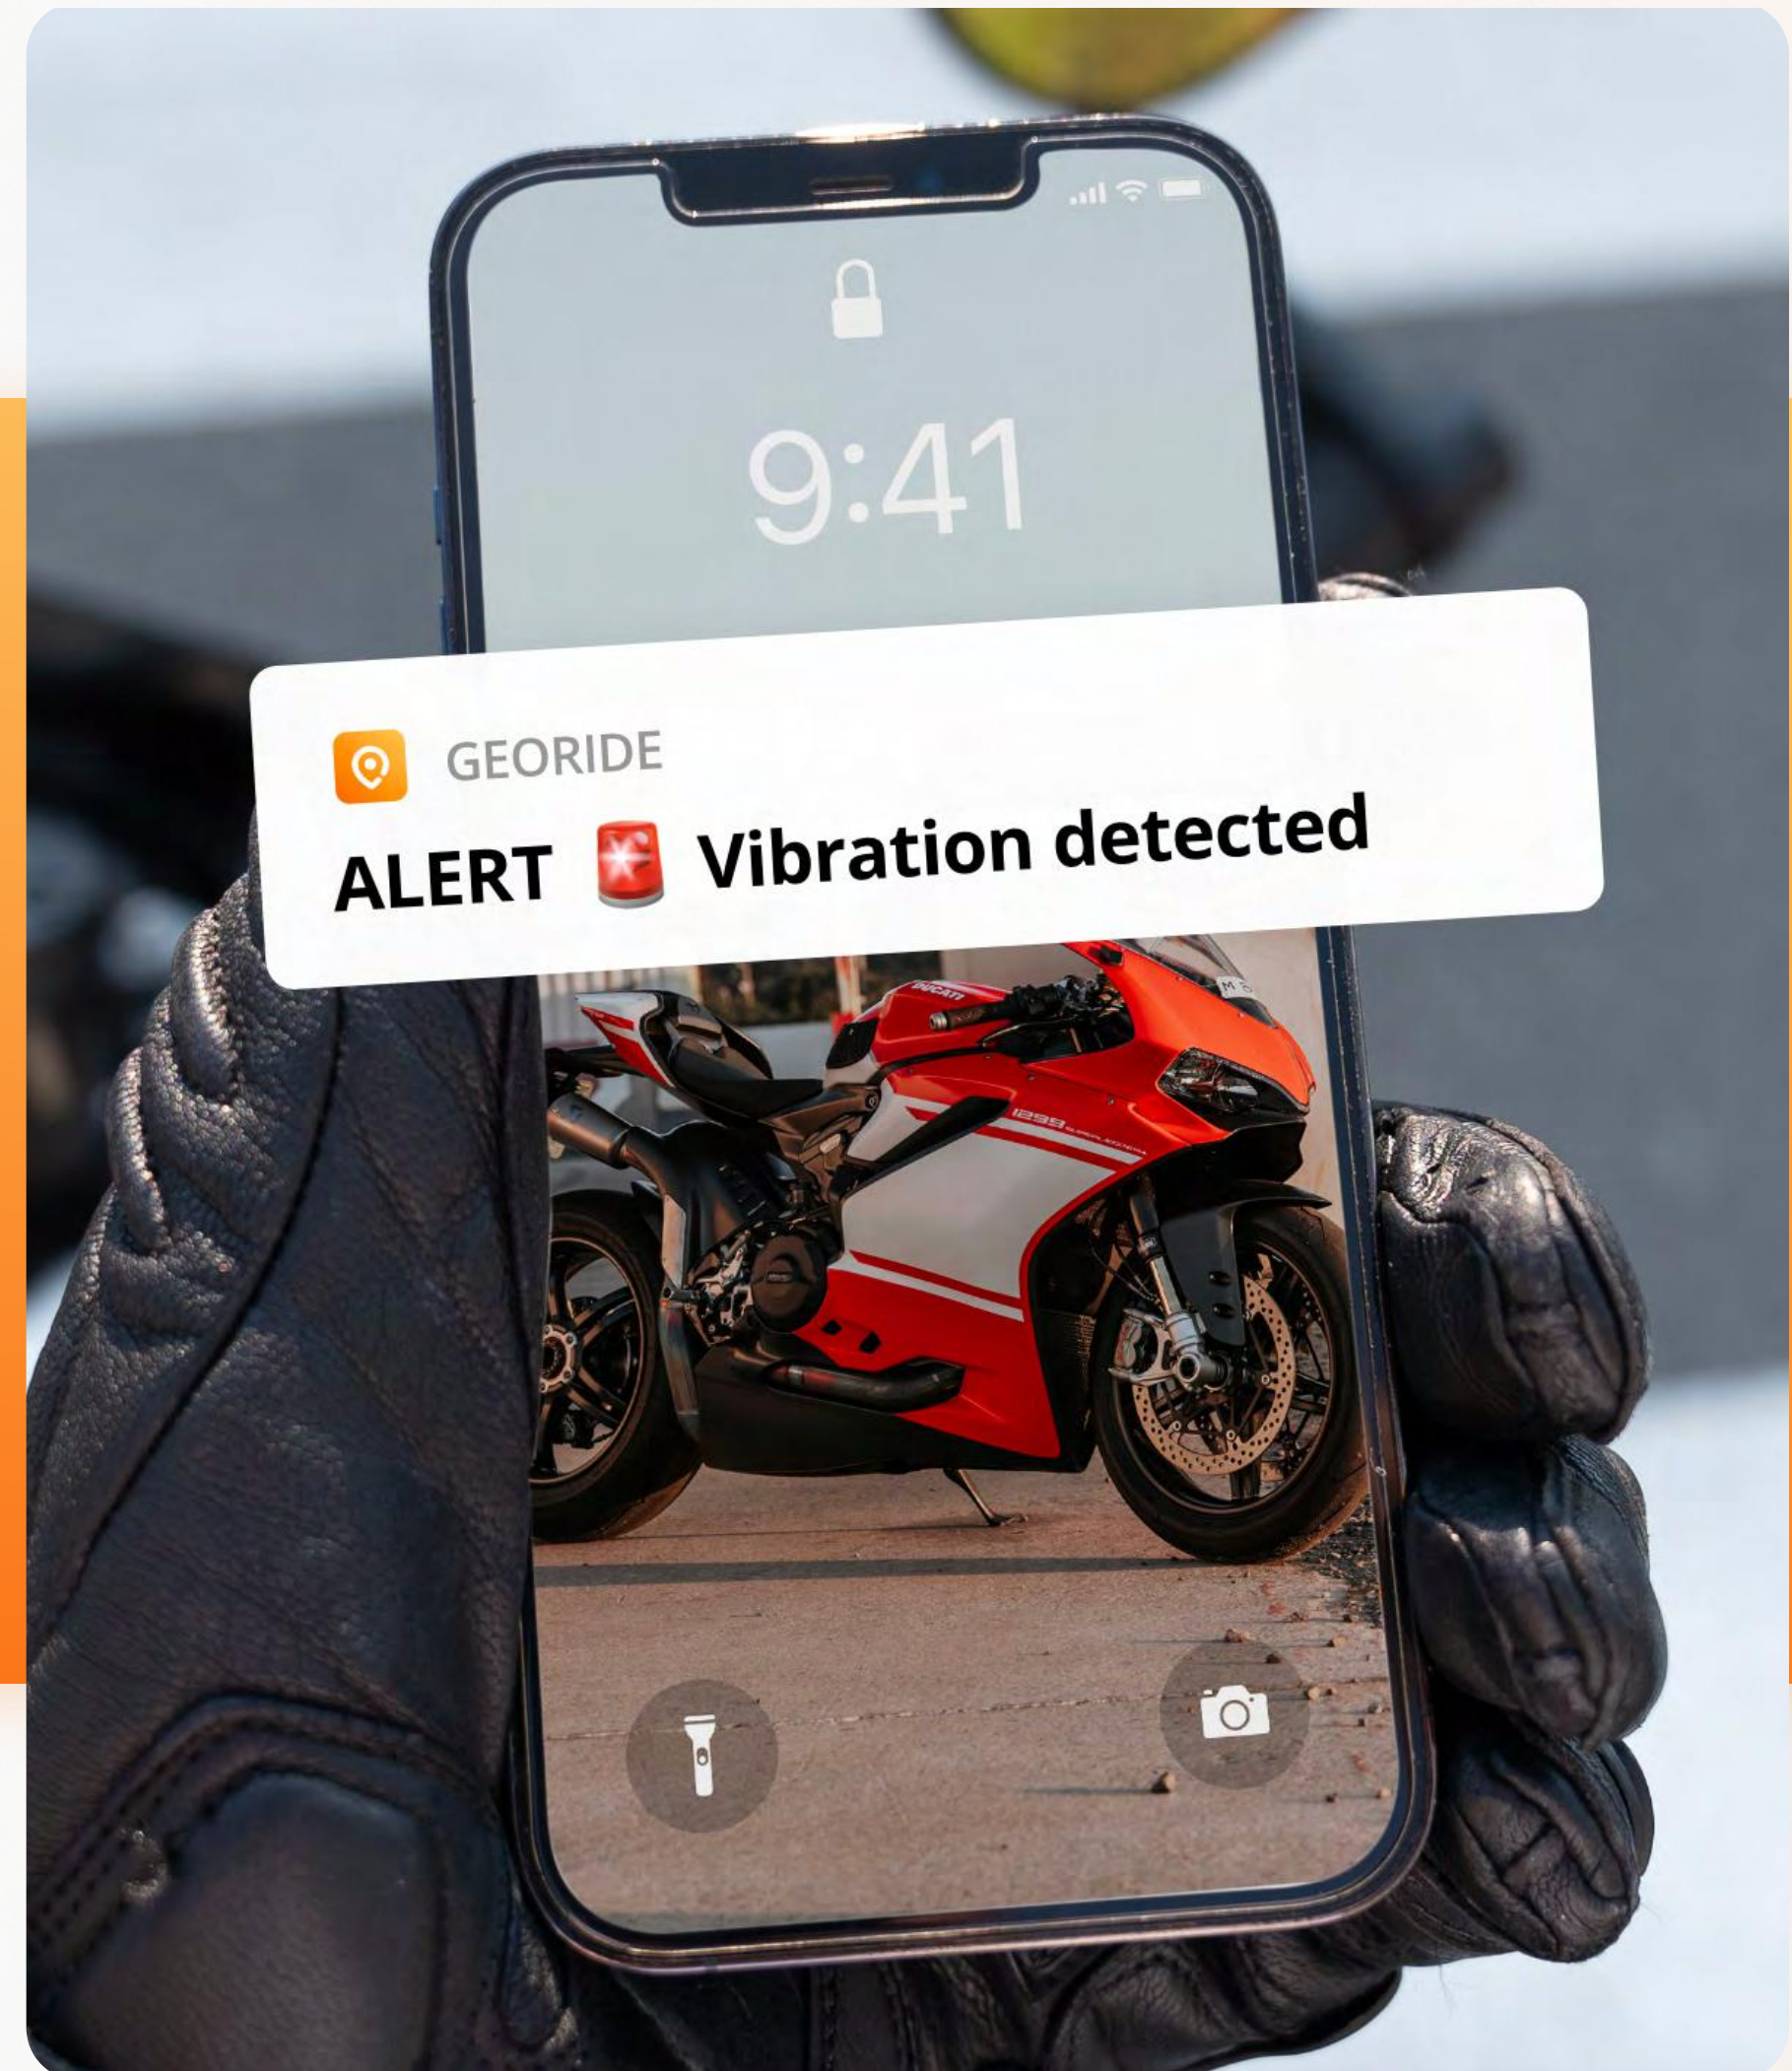

GeoRide lets you know when it's time to check your tire pressure, lubricate your motorcycle chain or to do any recurrent service on your bike.

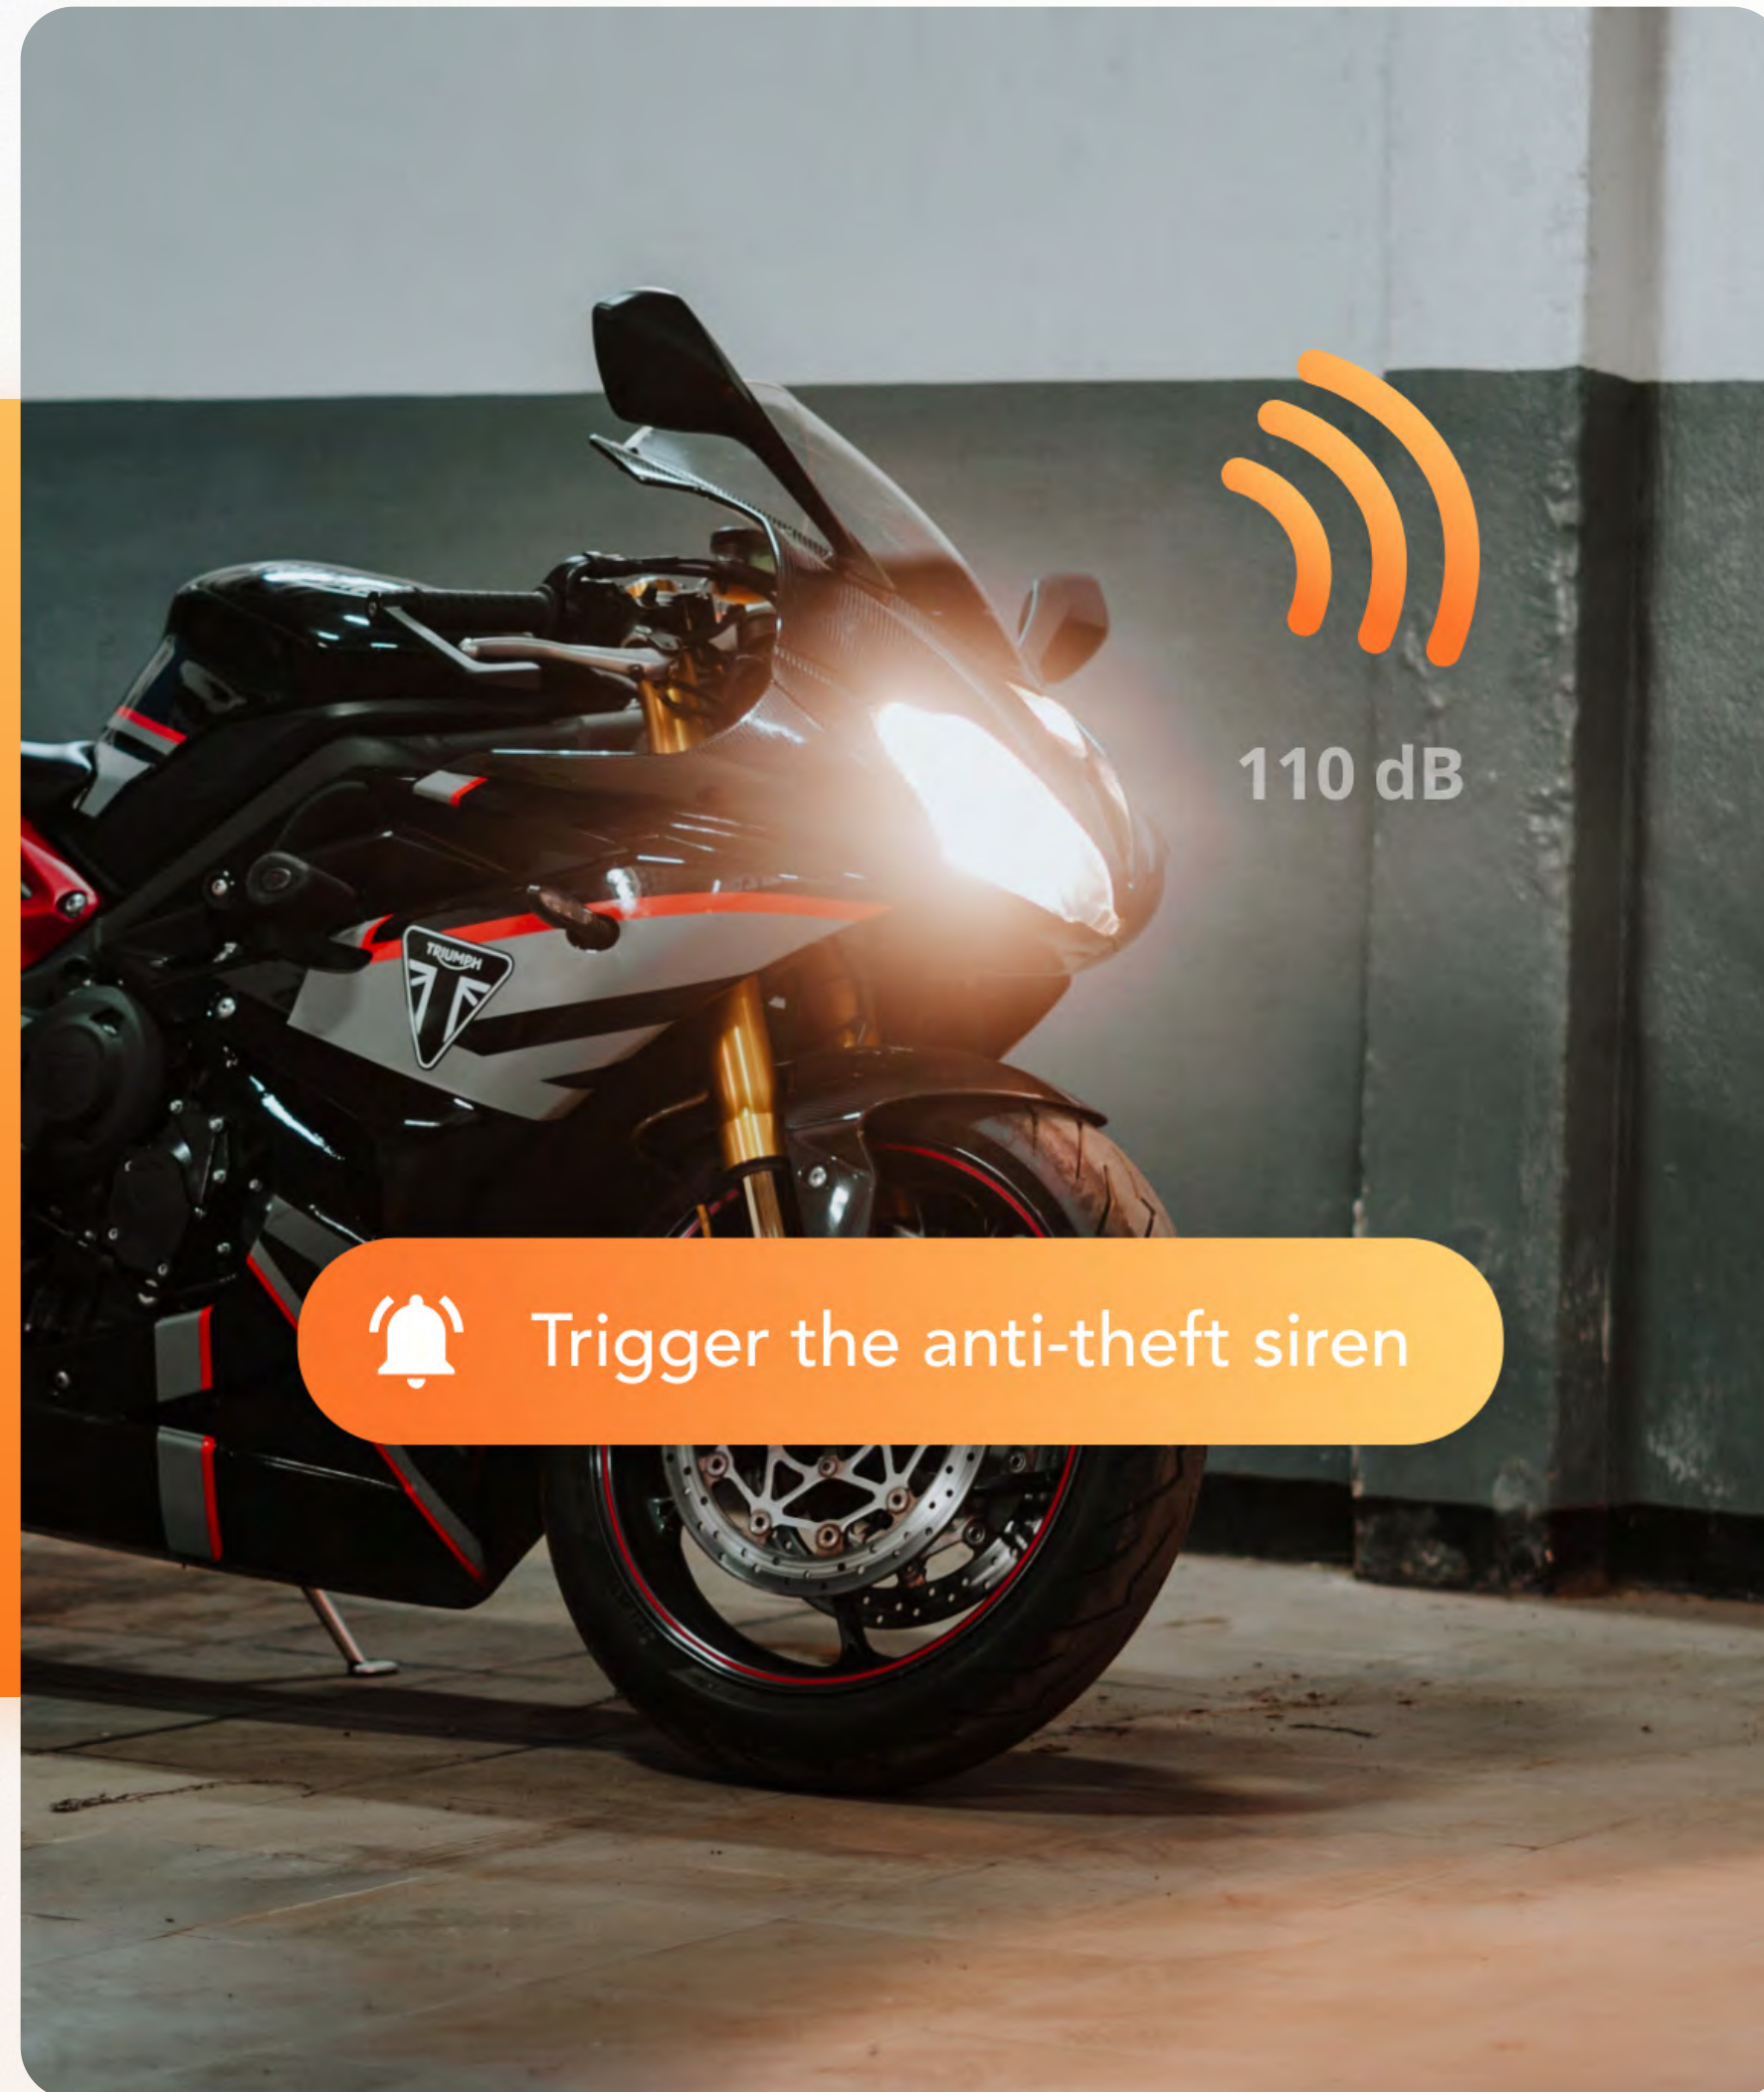

CONNECTED ALARM

Notification or call

At the slightest movement of your motorcycle, you are instantly warned by a notification or a phone call.

Remote-controlled Siren

After an alert, you can trigger your anti-theft siren remotely, howling up to 130 dB. You can set the siren to automatically activate at the slightest jerk.

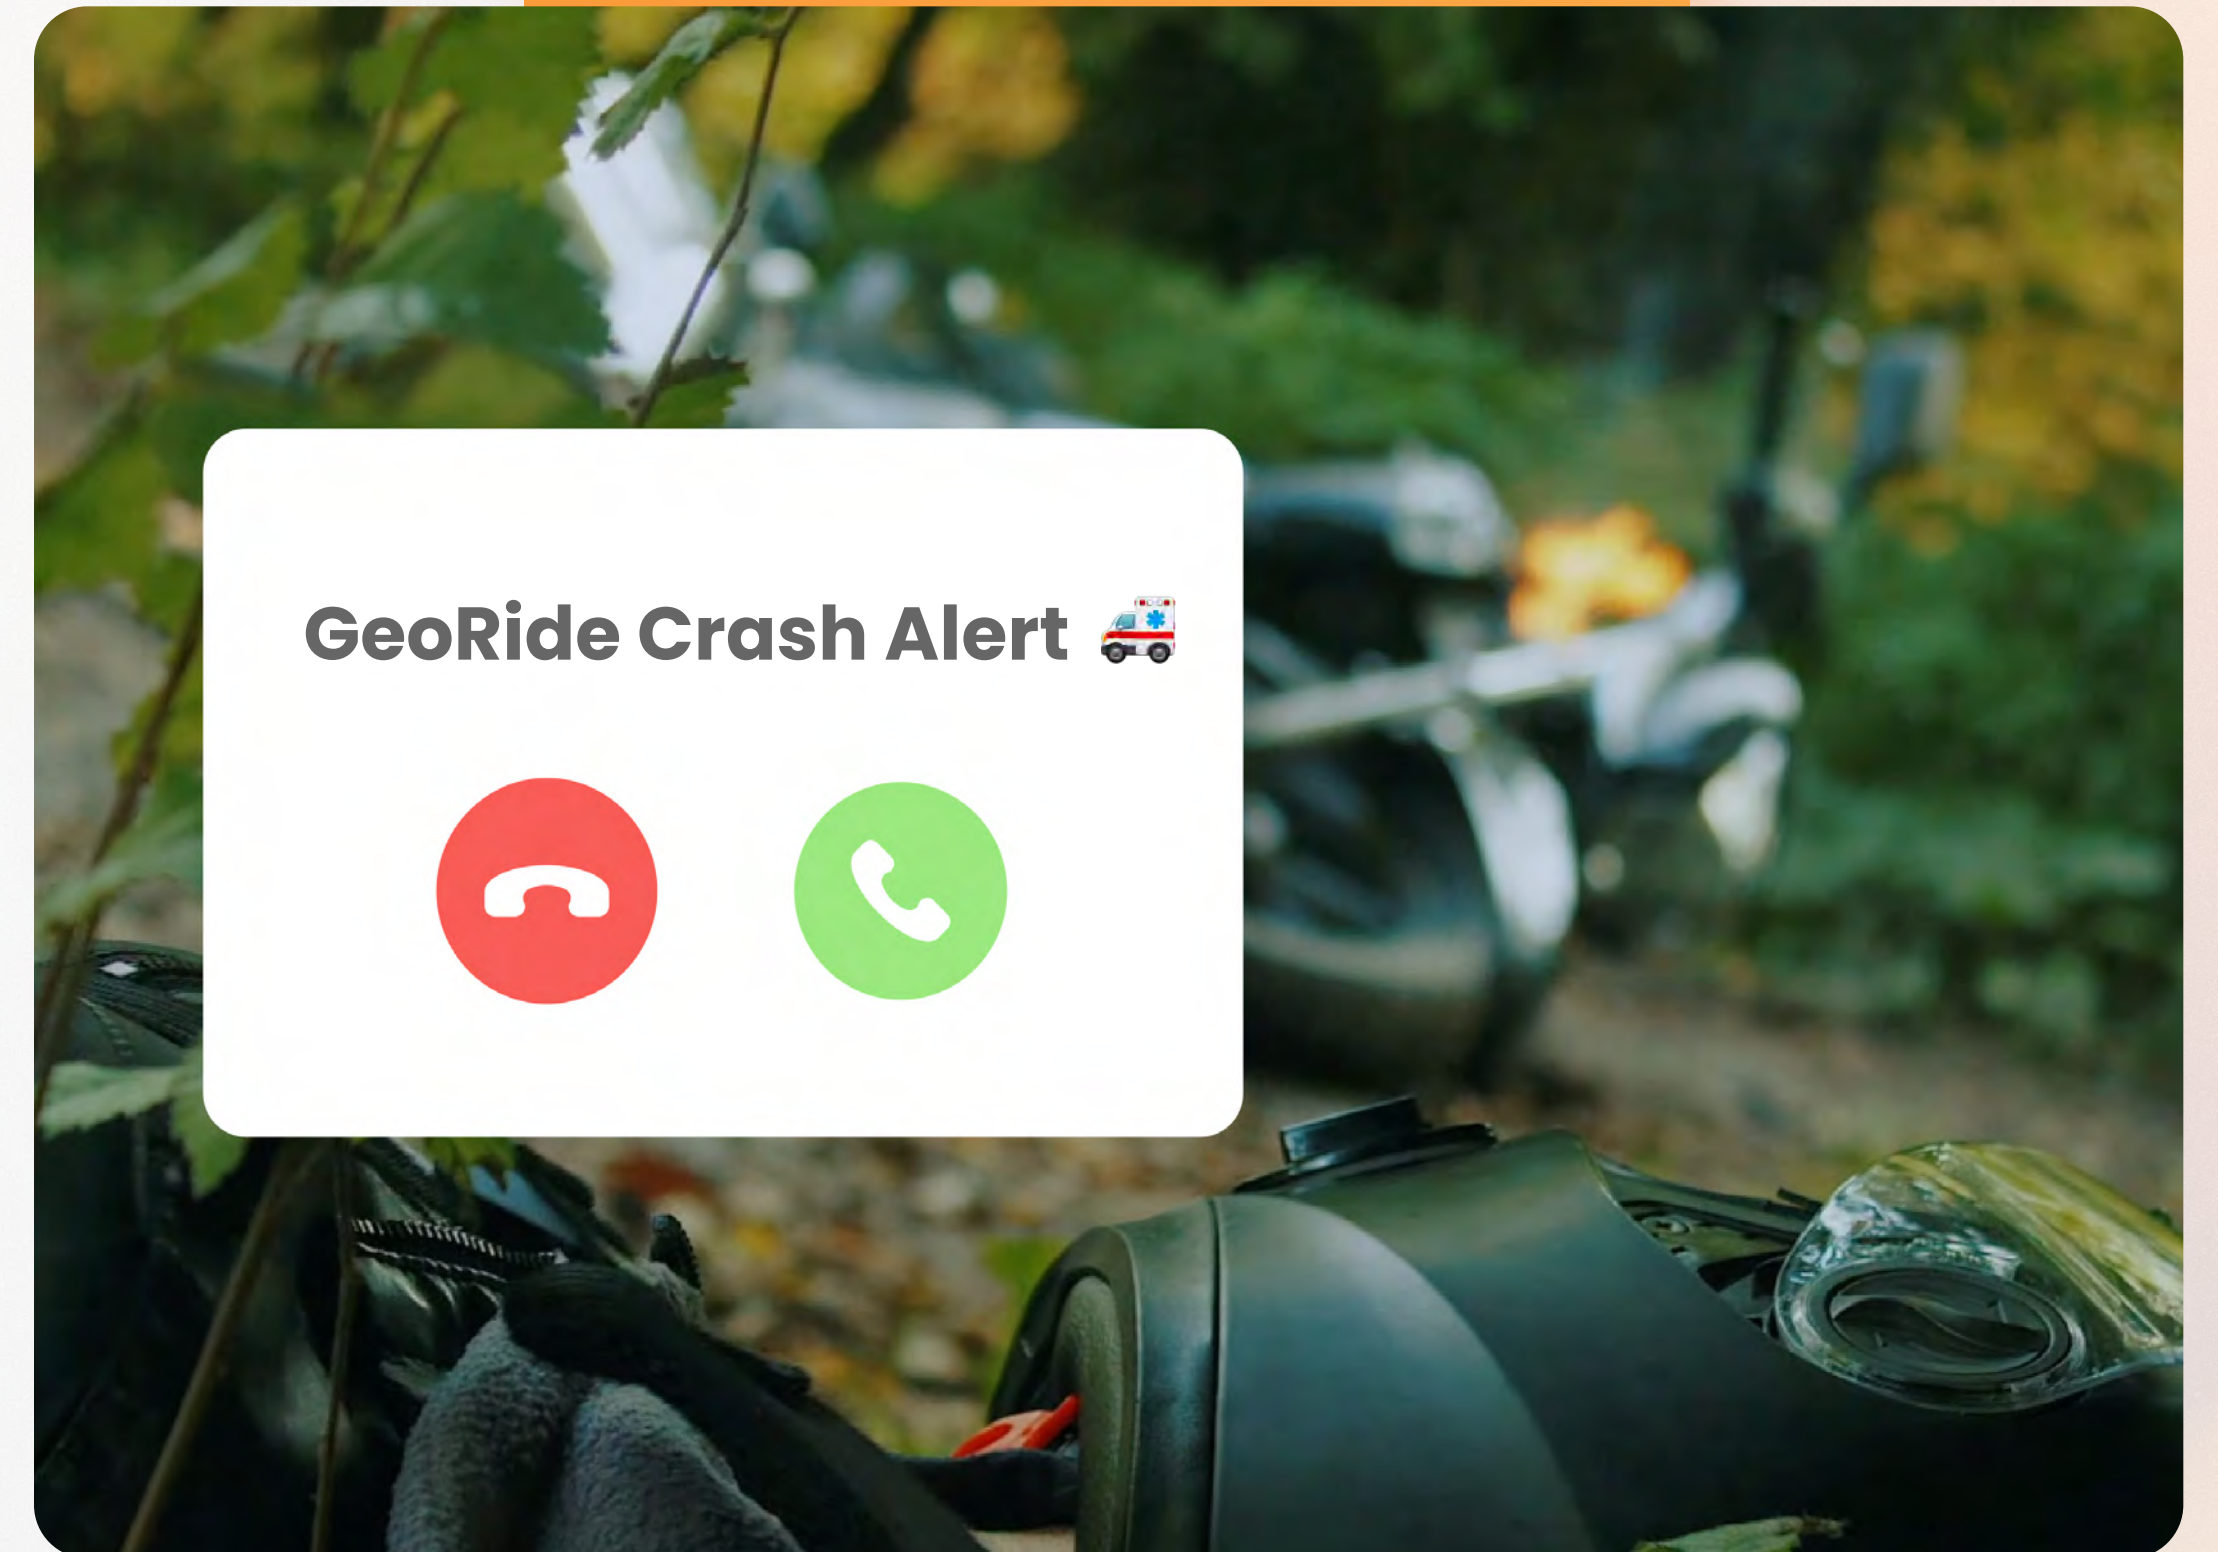

CRASH DETECTOR

Self-Sufficient

GeoRide functions on its own and have multi-operator coverage.

Reliable

GeoRide's sensors allow for precise and high-performance crash detection.

Emergency Call

How does it work ?

1

Crash detected

Thanks to the integrated gyroscope, GeoRide detects that the motorcycle has been on its side for a short period of time.

2

Check-up

Available 24/7, our assistance service calls you 3 times to find out about your state of health.

3

Emergency response

The emergency services will contact you right away. If you are not able to answer and that your bike is still not moving, a emergency team will be dispatch to your location to rescue you.

New Features

I Proximity Badge

The badge allows you to activate or deactivate protection automatically when you are near the motorcycle.

I Improved range

GeoRide continuously protects your motorcycle even after several months without riding it.

I Remote-controlled Siren

GeoRide is the only anti-theft device to have a fully remote-controllable siren.

I Underground coverage

4G LTE-M technology allows for optimal operation in most underground areas.

New Features

Galileo Constellation

The new Galileo constellation developed by the European Union allows for very high precision localization.

Anti-jamming

GeoRide is the only GPS Tracker to have a unique hybrid communication system.

IP54 Water resistance

The housing is resistant to dust and water splash.

Eco Mode

Useful for motorcycles without a battery. Recharge your GeoRide via USB cable and protect your motorcycle without using any wires.
